The Callan Periodic Table of Investment Returns conveys the strong **case for diversification** across asset classes (stocks vs. bonds), capitalizations (large vs. small), and equity markets (U.S. vs. global ex-U.S.). The Table highlights the uncertainty inherent in all capital markets. Rankings change every year. Also noteworthy is the difference between absolute and relative performance, as returns for the top-performing asset class span a wide range over the past 20 years.

The Callan Periodic Table of Investment Returns 2000–2019

Callan's Periodic Table of Investment Returns depicts annual returns for 8 asset classes, ranked from best to worst performance for each calendar year. The asset classes are color-coded to enable easy tracking over time. We describe the well-known, industry-standard market indices that we use as proxies for each asset class below.

- **Large Cap Equity (S&P 500)** measures the performance of large capitalization U.S. stocks. The S&P 500 is a market-value-weighted index of 500 stocks. The weightings make each company's influence on the Index performance directly proportional to that company's market value.
- **Small Cap Equity (Russell 2000)** measures the performance of small capitalization U.S. stocks. The Russell 2000 is a market-value-weighted index of the 2,000 smallest stocks in the broad-market Russell 3000 Index.
- **Developed ex-U.S. Equity (MSCI World ex USA)** is an international index that is designed to measure the performance of large and mid cap equities in developed markets in Europe, the Middle East, the Pacific region, and Canada.
- **Emerging Market Equity (MSCI Emerging Markets)** is an international index that is designed to measure the performance of equity markets in 26 emerging countries around the world.
- **U.S. Fixed Income (Bloomberg Barclays US Aggregate Bond Index)** includes U.S. government, corporate, and mortgage-backed securities with maturities of at least one year.
- **High Yield (Bloomberg Barclays High Yield Bond Index)** measures the market of USD-denominated, non-investment grade, fixed-rate, taxable corporate bonds. Securities are classified as high yield if the middle rating of Moody's, Fitch, and S&P is Ba1/BB+/BB+ or below, excluding emerging market debt.
- **Global ex-U.S. Fixed Income (Bloomberg Barclays Global Aggregate ex US Bond Index)** is an unmanaged index that is comprised of several other Bloomberg Barclays indices that measure the fixed income performance of regions around the world, excluding the U.S.
- **Real Estate (FTSE EPRA Nareit Developed REIT Index)** is designed to measure the stock performance of companies engaged in specific real estate activities in the North American, European, and Asian real estate markets.
- **Cash Equivalent (90-day T-bill)** is a short-term debt obligation backed by the Treasury Department of the U.S. government.

Callan's Periodic Table Follows up a Milestone Year in 2018 With a Blowout Year in 2019!

2018 marked a milestone year when virtually all broad asset classes (except for cash) posted negative returns, the first time we saw such a result in the history of the Callan Periodic Table stretching back to 1979. 2019 then followed up with one of the strongest years for asset class performance across the board. Large cap U.S. equity posted a 31.5% return, triple its long-run average, while developed ex-U.S. equity (+22.5%) and emerging markets (+18.4%) both notched robust rebounds from 14% declines the year before. Even more remarkable, given the expectations for the Federal Reserve to raise interest rates at the start of 2019, U.S. fixed income rose 8.7%, the best result since 2002. With most forecasters expecting rising rates in 2019, this strong result for fixed income was in direct contrast to losses predicted for the year, and two to three times higher than most longer-term return expectations. Recall that the fourth quarter of 2018 saw a sharp decline in equity markets around the world, and losses in fixed income following the ninth rate hike since the Fed began tightening in 2017. The Fed announced a pivot in policy in January 2019 to take a pause on rate hikes, and then enacted three rate cuts in July, August, and October. Confidence in the U.S. economy soared and the Fed reversal fueled both an equity and bond market rally, an unusual development during the later stages of an economic cycle.

Callan

Callan was founded as an employee-owned investment consulting firm in 1973. Ever since, we have empowered institutional clients with creative, customized investment solutions backed by proprietary research, exclusive data, and ongoing education. Today, Callan advises on more than \$2 trillion in total institutional investor assets, which makes it among the largest independently owned investment consulting firms in the U.S. We use a client-focused consulting model to serve pension and defined contribution plan sponsors, endowments, foundations, independent investment advisers, investment managers, and other asset owners. Callan has six offices throughout the U.S. Learn more at www.callan.com.
